

What is claimed:

- 1 1. A mop head, comprising:  
2 a top surface, a bottom surface and a side surface;  
3 and  
4 the side surface having a sculpted cutout.
- 1 2. The mop head of claim 1 wherein the sculpted cutout is an  
2 indentation corresponding to the shape of molding.
- 1 3. The mop head of claim 2 wherein the shape of the  
2 indentation corresponds to the shape of quarter round  
3 molding.
- 1 4. The mop head of claim 1, further comprising:  
2 a support member attached to the top surface.
- 1 5. The mop head of claim 4, wherein the support member has a  
2 side surface corresponding to the side surface of the mop  
3 head and the side surface of the mop head extends beyond  
4 the side surface of the support member.
- 1 6. A mop head, comprising:  
2 a top surface, a bottom surface and a side surface;  
3 the side surface having a sculpted cutout;  
4 the side surface joining the top surface at an edge;

the side surface joining the sculpted cutout at an edge; and

the sculpted cutout joining the bottom surface at an edge.

7. The mop head of claim 6 wherein the sculpted cutout is an indentation corresponding to the shape of molding.

8. The mop head of claim 7 wherein the shape of the indentation corresponds to the shape of quarter round molding.

9. The mop head of claim 6, further comprising:  
a support member attached to the top surface.

10. The mop head of claim 9, wherein the support member has a side surface corresponding to the side surface of the mop head and the side surface of the mop head extending beyond the side surface of the support member.

11. A mop, comprising:

a mop head having a top surface, a bottom surface and a side surface, the side surface having a sculpted cutout, the side surface joining the top surface at an edge, the side surface joining the sculpted cutout at an end, and the

6 sculpted cutout joining the bottom surface at an edge;

7 a support member attached to the top surface of the  
8 mop head; and

9 a mop handle attached to the support member.

1 12. The mop head of claim 11 wherein the sculpted cutout is an  
2 indentation corresponding in the shape of molding.

3 13. The mop head of claim 12 wherein the shape of the  
4 indentation corresponds the shape of quarter round molding.

5 14. The mop head of claim 11, wherein the support member has a  
6 side surface corresponding to the side surface of the mop  
7 head and the side surface of the mop head extends beyond  
8 the side surface of the support member.

1 15. A method of mopping comprising using a mop with a mop head  
2 having a top surface, a bottom surface and a side surface,  
3 the side surface having a sculpted cutout, the side surface  
4 joining the top surface at an edge, the side surface  
5 joining the sculpted cutout at an end, and the sculpted  
6 cutout joining the bottom surface at an edge to clean a  
7 floor and a molding together.

- 1 16. The method of mopping of claim 15 wherein the floor and  
2 molding are cleaned at the same time.
- 1 17. A mop head comprising:  
2 a top surface, a bottom surface, a first side surface  
3 and a second side surface;  
4 the first side surface having a sculpted cutout; and  
5 the second side surface having a sculpted cutout.
- 6 18. The mop head of claim 17 wherein the sculpted cutouts are  
7 indentations corresponding to the shape of molding.
- 8 19. The mop head of claim 18 wherein the shape of the  
9 indentations correspond to the shape of quarter round  
10 molding.
